Cookie policy

Zyph Tech, Lda. · https://erp.zyphtech.com · Updated 20 Nov 2026

1. What cookies are

Cookies are small files stored in your browser. Zyph ERP uses only first-party cookies on erp.zyphtech.com. We do not run third-party ad networks on this site.

2. Essential cookies

zyph-session — the visit session and, if you sign in, the login. Without it the site and forms do not work.

XSRF-TOKEN — stops forged form posts (contact, consent, login).

zyph_cookie_consent — stores your choice on this banner for 12 months.

These cookies always run. The language you pick (?lang=) is stored in the session, not in a separate cookie.

3. Preferences

zyph_theme — remembers light or dark theme for 12 months. It is only written if you allow preference cookies. Without it, theme can still stay on this device (local storage).

4. Analytics

If you allow analytics, the home page records one visit per session (visit source, no name) so Zyph can see whether the site is used. Without consent, that count does not run.

5. WhatsApp and phone

The WhatsApp and call buttons are links. WhatsApp or the operator only process data after you click; Zyph does not set their cookies before that.

6. How to choose

On the banner at the bottom of the page you can accept all, keep essentials only, or come back here. You can also delete cookies in the browser; the banner returns on the next visit.
